JOURNAL OF OPTIMIZATION THEORY AND APPLICATIONS: Vol. 29, No. 4, DECEMBER 1979

Subject Index to Volume 29

Adaptive gains, 101
Advertising, 615
Approximation of functions, 199
Approximation techniques, 383
Approximation theory, 559
Asymptotic expansion, 231
Asymptotically proper systems, 301

Bounded controls, 409

Capture, 77
Circular error probable, 101
Compact convex control sets, 301
Cone dominance, 573
Constant gains, 101
Constrained minimization, 521
Control parameterization Ritz method, 369
Control theory, 253, 629
Controllability, 77, 291
Controllability of delay systems, 301
Convergence proofs, 369
Convexification procedures, 169
Convexity, 345
Covariance, 101

Decomposition methods, 169
Delay systems, 301
Differential games, 629
Displacement analysis, 53
Double-stage filtering, 101
Duality theory, 629

Economic application, 615
E-dominance, 253
Efficiency, 1
Efficient points, 573
Engineering plasticity, 53
Error analysis, 147
Error bounds, 369
Euclidean controllability, 301
Existence of solutions, 437

Fan fixed-point theorem, 291
First boundary condition, 437
Fixed-endpoint problems, 231
Four-bar function generators, 147
Function generators, 147
Function space controllability, 291, 301
Functional differential equations, 383
Functional inclusions, 291

Generalized boundary-value problem, 291
Global minimization, 331
Global optimization, 331
Green's theorem approach, 615

Indirect control proof, 253
Infinite horizon, 615
Infinitely differentiable functions, 199, 345
Intermediate constraints, 253
Interval analysis, 331
Invariant imbedding, 67
Isotone optimization, 559

Kalman filtering, 101

0022-3239/80/1200-0669$03.00/0 © 1980 Plenum Publishing Corporation

L_1-optimization, 409
Limit-load analysis, 53
Linear control systems, 409
Linear programming, 53, 559
Local convex conjugate functions, 169
Lower value, 135
Lyapunov functions, 77

Measurement noise, 101
Method of successive starts, 67
Modified LJ search method, 87
Monotone approximation, 345
Minimum variance criterion, 147
Multicriteria optimization, 1
Multiple objective optimization, 573
Multiplier methods, 169

Navigation, 101
Nearest feasible path, 615
Necessary conditions for optimality, 437
Nonlinear control problems, 383
Nonlinear neutral functional differential inclusions, 291
Nonlinear neutral functional differential systems, 291
Nonlinear programming, 199, 345, 493, 521
Nonlinear time-delay systems, 87
Normality, 215

Observation noise, 101
Optimal control, 155, 615
Optimal control problems, 231, 369, 437
Optimal stationary equilibria, 615
Optimal strategies, 629
Optimality conditions, 573
Optimization on function spaces, 345
Optimum design, 147
One-dimensional optimization, 331

Parabolic partial differential equations, 437
Pareto optimality, 1, 573
Partially ordered sets, 559
Periodic optimal control, 215
Polynomial approximations, 87
Positive invariance, 77
Precision points, 147
Preferences, 1
Primal-dual methods, 169
Probable error, 101
Process noise, 101
Proper performance improvement, 215
Pursuit–evasion games, 135
Pursuit–evasion problems, 629

Quadratic programming, 53
Quasi-Newton algorithm, 521
Quasi-Newton formulas, 493
Queueing systems, 155

Reachable sets, 301
Ritz method, 369

Scott's method, 67
Second variation, 215
Semigroups, 383
Single-server queueing systems, 155
Singularly perturbed nonlinear systems, 231
Spherical error probable, 101
Spline functions, 369
Square-root filtering, 101
Starshaped functions, 559
State estimation, 101
State propagation, 101
Strategy, 135
Suboptimal control, 87
Sufficient conditions, 215
Sufficient optimality conditions, 253

Surver papers, 1
Symmetric rank-one update, 493, 521

Tchebycheff polynomials, 199
Time delay systems, 437
Time scale decomposition, 231
Two-point boundary-value problems, 67

UD filtering, 101
Ultimate boundedness, 77
Uniqueness of solutions, 437
Upper value, 135
Utility, 1

Variance, 147
Vector maximum problem, 1
Vector optimization, 573
